RESEARCH

Researcher, ANU MINT Lab — *Evading Unjust Policy* 2025–present

Investigating compliance overspill in LLM safety systems — cases where AI refusals block ethically and legally permissible actions. Designed evaluation dataset, LLM-as-judge pipeline, and operational validity gates. Paper ("Blind Refusal") accepted at COLM 2026.

Principal Investigator, Lacy-Fischer Interdisciplinary Research Grant 2025–present

Computational text analysis and topic modeling examining ideological differences in AI research across institutional contexts (with Sociology Department).

Researcher, Vanderbilt University, Levin Lab 2025–present

Experimental design and philosophical framing for AI-driven chatbot interventions aimed at improving students' moral reasoning.

Researcher, Vanderbilt & Harvard — The Galen Project 2024–present

Evaluating AI translations of ancient Greek medical texts against expert human translations using automated MT metrics, expert MQM annotation, and blind preference surveys (with Classics and the Center for Hellenic Studies).

Research Affiliate, ANU MINT Lab 2024–present

Editor, *Philosophy of Computing Newsletter* (weekly and monthly editions; 911 subscribers).

Researcher, Vanderbilt & Harvard — Source Analysis Engine Project 2024–present

Computational approaches to classical source analysis using multi-shot API prompting and vector similarity search.

Ethicist, Vanderbilt University, RPW Center 2023–2024

Ethical analysis and research design for IRB-approved study on vulnerability to AI-driven phishing attacks.
